Bureaucracy

TA hasn't emailed me

Lecture

Latency Control
Dealing with Non-Determinism
Overhead

Linux POSIX SCHED_FIFO overview

Is web browsing a real-time service?
best effort type of service for most users, server side it might be more real-time.
question came up about networks, not really embedded, so ignored

use cheddar to check work.
It is a tool that is used to help make or check timing diagrams.
an anytime service is one that responds better if you respond at the deadline. Will perform if you do it before, will fail if after deadline.

again, resources are, CPU, IO, Memory

notes are pretty interesting.

Linux Trace Toolkit
